

# Ana Lorena Ortiz Loyola

Frankfurt am Main, Germany

☎ +49 176 62145797 • ✉ a01750283@tec.mx • [LinkedIn](#)

Data science student (Tecnológico de Monterrey, expected 2027) with hands-on experience in data mining, predictive analytics, and machine learning across healthcare, environmental, and financial-services domains. Brings practical database and pipeline development experience from a data engineering internship at Deutsche Bundesbank (AnaCredit), combined with strong Python/SQL skills and hands-on use of AI-assisted development tools (Claude Code) to accelerate a personal data-pipeline project.

## Core Competencies

---

- **Data Mining & Predictive Analytics:** Random Forest, SVM, K-Means, classification, clustering, time-series analysis
- **Database & Pipeline Modeling:** SQL, SQLite, normalized schema design, ETL/ELT
- **Programming:** Python, R, SQL, Java, C++
- **Financial Services Experience:** Regulatory data engineering and data quality automation (Deutsche Bundesbank AnaCredit)
- **AI-Assisted Development:** Practical experience with AI coding tools (Claude Code), used to accelerate a personal data-pipeline project
- **Cloud & Visualization:** Azure Cognitive Services, AWS, Tableau, Matplotlib, Seaborn

## Professional Experience

---

- **Deutsche Bundesbank (AnaCredit)** **Frankfurt am Main, Germany**  
*Data Engineer / Intern* *04/2026–07/2026*
  - Developed automated migration tests (row counts, referential integrity, aggregate consistency) using Pandas DataFrames to validate business logic after data migration
  - Built automated error detection identifying statistical deviations (duplicate IDs, value-range violations) in large-scale reported banking data, with automated Jira ticketing and stakeholder communication

## Projects

---

- **Tecnológico de Monterrey**  
*Predictive Modeling – Healthcare Optimization* 10/2024–12/2024
  - Mined 25+ years of national health data to identify patient risk profiles and resource bottlenecks
  - Built and validated predictive models (Random Forest, Neural Networks) and K-Means clustering; ran exploratory time-series analysis to uncover seasonal patterns
- **Tecnológico de Monterrey**  
*Air Quality Analysis Mexico City – SVM Classification* 04/2023–06/2023
  - Built SVM models (linear and RBF kernels) to classify critical ozone levels from citywide NO<sub>x</sub>/O<sub>3</sub> data; visualized and communicated findings
- **Personal Project (GitHub), built with Claude Code**  
*Banking Data Pipeline – Data Cleaning & Audit Log* 05/2026
  - Designed a normalized SQLite database schema with foreign-key integrity checks for simulated bank transaction data (150 accounts)
  - Staged data cleaning with a fully auditable log; produced quality visualizations and a structured exception report
- **Tecnológico de Monterrey**  
*Lattice-Based Cryptography Research* 10/2024–02/2025
  - Implemented and analyzed the complexity of lattice-based cryptographic algorithms (LWE, NTRU) in Python; contributed to a scientific publication

## Education

---

- **Tecnológico de Monterrey** **Mexico**  
*BSc in Data Science* 2022–2027  
Grade: 1.3 (Academic Excellence Scholarship; DAAD KOSPIE Scholarship). Topics: data analysis & statistics, machine learning & AI, numerical optimization.
- **Universität Göttingen** **Germany**  
*Exchange Semester* 2025–2026

## Languages

---

- German (C1), English (C1, TOEFL iBT 105/120), Spanish (native).

## Publications

---

- Contributed to a scientific publication on lattice-based cryptography (LWE, NTRU security parameter and runtime analysis), with Prof. A. F. De Abiega L'Eglise, Tecnológico de Monterrey (citation pending publication).

## Honors and Awards

---

- **Academic Excellence Scholarship** – Tecnológico de Monterrey.
- **DAAD KOSPIE Scholarship**.
- **National Physics Olympiad** – Mexico (2020).
- **Honorable Mention, Physics Olympiad** (2021).
